PROFESSIONAL SUMMARY

B.Tech graduate in Artificial Intelligence and Data Science with hands-on experience building Generative AI applications on Google Cloud Platform. Completed a GenAI internship at Wipro Limited, developing Gemini-based conversational systems, accessibility automation tools, computer vision solutions, and RAG-based chatbots using FastAPI, React, Vertex AI, and Cloud Run. Proficient in Python, SQL, FastAPI, LangChain, and LangGraph, with a strong interest in AI agents and scalable, cloud-based intelligent applications.

SKILLS

Programming Languages: Python, SQL

Cloud & AI Platforms: Google Cloud Platform (Vertex AI, Gemini, Vision API, Translation API, Cloud Storage, Cloud Run, ADC)

Frameworks & Tools: FastAPI, LangChain, LangGraph, React, HTML, CSS, JavaScript

Machine Learning: NumPy, Pandas, Scikit-learn, PyTorch

Languages: Tamil, English

PROFESSIONAL EXPERIENCE

GenAI Intern — *Wipro Limited, Bangalore* Jul 2025 – Oct 2025

- Worked on Generative AI and Google Cloud projects spanning conversational systems, accessibility automation, computer vision, and RAG-based chatbots.
- Implemented end-to-end solutions using FastAPI, React, Playwright, Vertex AI, Gemini models, Cloud Run, and Cloud Storage.
- Gained hands-on experience deploying AI applications on GCP, integrating LLMs, and building scalable backend APIs.
- Collaborated with Wipro engineering teams in a corporate development environment.
- Participated in the Google–Wipro Cloud Hackathon, applying modern cloud tools to real-world business challenges.

Data Science Intern — *CodSoft* Sep 2024 – Oct 2024

- Completed five data science tasks using real-world datasets while managing timelines to ensure on-time delivery.
- Used Python and data science libraries to perform data analysis and exploratory data analysis (EDA).
- Built data preprocessing pipelines, handling missing values and outliers to improve data quality.
- Collaborated with a virtual team to deliver project outcomes remotely.

PROJECTS

Gemini Chat Translator (Text + Audio)

- Built a multimodal chatbot using the Gemini Flash model supporting multilingual translation and text-to-speech, with a FastAPI backend and React frontend deployed on Cloud Run.
- Integrated Google Cloud Translation API to support real-time multilingual text and voice translation across multiple languages.
- Designed a responsive React interface allowing users to switch seamlessly between text and audio input modes.
- Containerized the application and deployed it on Cloud Run for scalable, serverless hosting.

ADA Compliance Checker

- Developed an automated accessibility auditing tool using Playwright and Axe-core, generating severity-based ADA violation reports exportable to .docx.
- Automated scanning of web pages with Playwright to detect WCAG accessibility violations without manual review.
- Generated detailed, severity-ranked audit reports with actionable remediation guidance for developers.
- Enabled batch scanning of multiple URLs, reducing manual accessibility testing effort significantly.

Vision API Image Validation

- Built a retail image analyzer using Google Vision API to detect and count products from images, integrating Cloud Storage for image handling and automated stock triggers.
- Applied Google Vision API for object detection and product counting from retail shelf images.
- Implemented a Cloud Storage pipeline for automated image upload, retrieval, and processing.
- Configured stock-alert triggers to notify inventory teams when product counts dropped below threshold levels.

RAG-Based Conversational Agent

- Created a knowledge-grounded chatbot using RAG and Gemini to accurately answer dataset-related queries; deployed on Cloud Run and integrated into Wipro's internal artifact repository.
- Implemented a retrieval-augmented generation pipeline combining vector search with Gemini for context-aware responses.
- Indexed and embedded internal documentation to ground chatbot responses in accurate, domain-specific data.
- Integrated the chatbot into Wipro's internal artifact repository for organization-wide access.

FAQ Assistant using LangChain and LangGraph

- Built an FAQ assistant chatbot using LangChain and LangGraph for conversational flow orchestration, integrated with Hugging Face models for natural language understanding and response generation.
- Designed multi-turn conversational flow orchestration using LangGraph to manage dialogue state.
- Integrated Hugging Face models to improve natural language understanding and response accuracy.
- Added fallback handling for out-of-scope queries to improve overall user experience.

EDUCATION

B.Tech — Artificial Intelligence and Data Science 2022 – 2026 (Expected)
SSM Institute of Engineering and Technology, Dindigul, Tamil Nadu | CGPA: 8.0 / 10

Higher Secondary Education (HSLC) 2020 – 2022
MSP Solai Nadar Memorial Higher Secondary School, Dindigul, Tamil Nadu | Percentage: 78.6%

Secondary School (SSLC) 2020
MSP Solai Nadar Memorial Higher Secondary School, Dindigul, Tamil Nadu | Percentage: 77.4%

CERTIFICATIONS

- Google Cloud Skill Boost — Vertex AI, Generative AI, Cloud Storage
- Data Visualization — Forage
- Data Science & Analytics — HP Foundation
- HTML, CSS, JavaScript, MongoDB — Codetantra
- Python — IBM, Infosys Springboard
